## **RE: PLANNED DISRUPTION OF WATER SERVICE**

The Revis Road mainline replacement project has been progressing ahead of schedule and is currently nearing completion. Beginning Monday, January 29, 2007, we plan to start tying in the new facilities. This process will involve the need to shutdown water flow through the existing pipeline while changing over to the new pipeline. It is anticipated that these all of the changeovers will occur over a 4 to 5 day period.

The first phase will be to connect the new water main to the existing system at the intersection of Revis Road and Running Deer Drive as well as Revis Road and Limestone Circle. This shutdown of the system and tie in of new mainline is scheduled to occur on Wednesday, January 31, 2007 at 7:30am. Every effort will be made to return water service by 5:00pm. This first shutdown will potentially affect all residences on Revis Road from Running Deer Drive heading south to Yosemite Springs Parkway, Revis Way, Cedar Grove Court, Cedar Grove Way, Limestone Circle, Limestone Way, Limestone Court, Copper Creek Drive, Copper Creek Lane, Copper Creek Way and Copper Creek Court. All residences on the previously noted street should prepare for loss of service and/or reduced pressure.

The connections of the new water main with the existing system at Revis Way, Cedar Grove Court, Cedar Grove Way will occur on February 1<sup>st</sup> and February 2<sup>nd</sup>. During these shutdowns only one street at a time will be out of water service. These service disruptions are estimated to be 4 hours in duration each. Residents of these streets should plan accordingly for this period of disrupted water service.

The final phase of new system changeovers will begin on February 5, 2007 and continuing each day until completed. This final phase will involve switching over all of the residential water services along the construction path. These service disruptions

will be done one house at a time and the disruption will be very minimal (approximately 20 to 30 minutes per home maximum).

The Yosemite Spring Park Utility Company would like to apologize for the inconvenience that these service disruptions will cause. We ask that you please bear with us as this project nears completion.
